

ROHITH PAVULURU

Bloomington, IN | pavuluru.rohith@gmail.com | linkedin.com/in/pavuluru-rohith | rohith-pavuluru-portfolio.vercel.app | 9303334291

EDUCATION

- **Indiana University Bloomington** August 2023 - May 2025
Master of Science in Computer Science GPA: 3.967/4
Courses: Applied Algorithms, Software Engineering, Algorithms for Big Data, Data Mining, Applied Machine Learning, Computer Networks.
- **BMS Institute of Technology and Management** August 2019 - July 2023
Bachelor of Engineering - Computer Science and Engineering GPA: 9.11/10
Courses: Data Structures and Applications, Object-Oriented Concepts, Database Management Systems, Neural Networks.

EXPERIENCE

- **Nokia Solutions and Networks** Bengaluru, India
DevOps Engineer February 2023 - July 2023
 - Configured **Alertmanager** for efficient handling of system alerts and utilized **Grafana** to visualize and monitor metrics, streamlining metrics with **Kafka**. Improved over **15 Grafana dashboards**, increasing system reliability by **22%**.
 - Led the proof of concept (POC) and implementation of a **dynamic log management solution** for **OpenSearch** application audit logs, enhancing log management capabilities while ensuring other logs remained unaffected.
 - Utilized **Kubernetes**, **Docker**, and **Helm** to streamline the deployment process, reducing deployment time by **25%** and enhancing tool reliability. Implemented and optimized **Docker images**, achieving up to **50% size reduction**.
 - Achieving **92.4% code coverage** by **JUnit** and **end-to-end tests**.
- **Nano Robotics Embed Technologies** Bengaluru, India
Software Engineer July 2022 - October 2022
 - Led the development of an advanced **weather forecasting model**, improving prediction accuracy by **12%** using **multiple linear regression** and **Bayesian neural networks** with data from the **Indian Meteorological Department**.
 - Analyzed over **1,000,000 data points**, enhancing model performance and creating over **15 interactive visualizations** with **Matplotlib** for data-driven decision-making.
 - Employed **subtractive clustering techniques** and leveraged **Python** and **scikit-learn** in an **Agile** environment.
- **Pramahasoft Solutions Pvt Ltd** Hyderabad, India
Software Engineer February 2021 - June 2022
 - **Designed and optimized data pipelines** using **Infor Data Lake**, **Infor ION**, and **Snowflake**, ensuring efficient data integration, seamless flow, and high accuracy for downstream applications.
 - **Developed and automated data processing workflows** with **Python (Pandas, NumPy)** and **SQL**, enhancing performance, resolving data inconsistencies, and eliminating manual work through robust automation.
 - **Built and deployed interactive dashboards** using **Tableau**, enabling real-time data visualization for over 50 stakeholders, driving data-driven decision-making.
 - **Engineered a centralized reporting platform**, streamlining access to critical data, improving system scalability, and reducing report generation time by 40%.

PROJECTS AND PAPERS

- **CourseCraft**
 - Developed a comprehensive **Learning Management System** with key features including user **MFA** (Multi-Factor Authentication) and engineered **backend architecture** using **Firebase** and **AWS cloud services**.
 - Enhanced system **security** by integrating **Google API** and **Duo Authentication API**. Contributed to **full-stack development** including **frontend UI**, **backend logic**, and **database management**. Collaborated effectively in an **Agile** team environment, participating in **deployment processes** and **iterative development cycles**.
- **Blood Registry using Blockchain**
 - Directed the **front-end development** and supported smart contract creation using **Solidity** for a web portal integrated with the **Ethereum Blockchain**, handling **500+ transactions securely**. Securing data with **AES encryption**.
 - Part of the winning team in **Asia's largest innovation hackathon**, recognized for enabling **transparent blood information management**, ensuring **privacy and integrity**.
 - Research paper **Blockchain Implementation for Blood Registry Using Ethereum Network** (Under Review).

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, JavaScript, Go, SQL.
- **Web Development & Testing:** HTML5, CSS3, Tailwind, JavaScript, React, Node.js, Next.js, Django, Selenium.
- **Databases & Cloud Computing:** MongoDB, MySQL, AWS (Amazon Web Services), GCP (Google Cloud), SQLite.
- **Data Science & Machine Learning:** PyTorch, Scikit-learn, OpenCV, Pandas, Numpy, Matplotlib.
- **Cloud & DevOps:** Git, Docker, Jenkins, CI/CD (GitHub Actions, GitLab), Kubernetes.
- **Tools & Platforms:** Postman, UFT, Jira, UIPath Studio, Android Studio, Firebase, Linux, Tableau, Power BI.

CERTIFICATIONS AND AWARDS

- **AWS Certified Cloud Practitioner**
Amazon Web Services (AWS), August 2024
- **Winner, Smart India Hackathon 2022**
Achieved first place in Asia's largest innovation hackathon with the "Blood Registry Using Blockchain" project.
